

RAMESH KRISHAN

SOFTWARE ENGINEERING UNDERGRADUATE

+94 702913026 colombo, sri lanka sudarshanakrishan123@gmail.com

Portfolio Github LinkedIn Medium

SUMMARY

Third-year Software Engineering undergraduate at the University of Kelaniya with hands-on experience in full-stack application development, data analytics, and machine learning projects. Skilled in developing scalable web applications using MERN stack and Spring Boot, with practical experience in Python, SQL, RESTful APIs, and dashboard development. Experienced in data preprocessing, exploratory data analysis (EDA), predictive modeling, and interactive data visualization using modern analytical tools. Interested in Software Engineering, Data Science, and building data-driven solutions for real-world business problems.

EDUCATION

B.Sc.(Hons.) Software Engineering

University of Kelaniya

April 2024 – Present

Kelaniya, Sri Lanka

- CGPA : 3.12
- Specializing in Net-Centric Applications, Data Science Engineering Applications, Health Informatic Applications and Game Development Applications domains.

G.C.E. Advanced Level

Sir John Kothalawala College

March 2021 – January 2023

Kurunegala, Sri Lanka

- Z-Score : 1.6096

PROJECTS

Friutflow Individual

April 2026 – Present

GITHUB REPO

- Engineered a full-stack MERN-based eCommerce platform with 10+ RESTful APIs
- Designed 15+ responsive React.js components using Tailwind CSS
- Integrated secure JWT authentication and role-based authorization workflows
- Built product browsing, filtering, cart, and order management systems
- Containerized application services using Docker Compose for scalable deployment
- Integrated centralized API communication between frontend and backend systems
- Individually managed full-stack architecture, development, and deployment workflows

Keywords: eCommerce, Authentication, Admin Dashboard, Payments

Technologies: MERN, Tailwind CSS, JWT, Docker

FGhub Individual

April 2026 – Present

GITHUB REPO

- Created a full-stack movie and gaming platform using React.js and Spring Boot
- Architected a scalable backend system with secure JWT authentication
- Developed a rating and review system supporting 100+ media records
- Designed 12+ responsive UI components for browsing and user interaction
- Integrated AI-powered recommendation features and 8+ RESTful APIs
- Utilized MongoDB and Docker for scalable data management and deployment

Keywords: Microservice, Authentication, Dynamic Rating System, AI-based assistant

Technologies: Spring Boot, React.js, Rest API, MongoDB, Docker

Customer Churn Prediction System Individual

May 2026 – Present

GITHUB REPO

- Engineered an end-to-end customer churn prediction system using Python and Scikit-learn
- Performed data preprocessing, feature engineering, and exploratory data analysis on telecom datasets
- Developed a Random Forest classification model for predicting customer churn

- Built an interactive Streamlit dashboard for real-time churn prediction
- Deployed and serialized the trained ML model using Joblib for efficient inference
- Designed the complete ML pipeline from data processing to model deployment

Keywords: Machine Learning, Customer Churn, Predictive Modeling, Classification, Data Visualization

Technologies: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Streamlit, Joblib

Health Survey Dashboard [Individual](#)

📅 February 2026 – Present [GITHUB REPO](#)

- Developed an interactive healthcare analytics dashboard using Microsoft Power BI
- Processed and transformed health survey datasets using Power Query and Excel
- Designed KPI-driven visualizations to analyze health trends and lifestyle patterns
- Built dynamic dashboards for survey analysis and data-driven insights
- Applied data cleaning and transformation techniques for structured reporting
- Managed dashboard design, data modeling, and visualization workflows independently

Keywords: Data Analytics, Healthcare Analytics, KPI Reporting, Data Visualization

Technologies: Power BI, Excel, Power Query, Data Visualization

SKILLS

Data & Analytics: Python, SQL, Data Modeling, Data Visualization, Statistical Analysis, ETL Concepts

Concepts: Data Warehousing, Data Cleaning, KPI Reporting, Dashboard Design

Frontend: React.js, JavaScript, HTML5, CSS3, Tailwind CSS

Backend: Spring Boot, Express.js, Node.js, Java, PHP

Database: MongoDB, MySQL

Tools: Power BI, SPSS, Excel, Git, Docker, JIRA, Figma, Adobe Photoshop, Unity, Unreal Engine

CERTIFICATIONS

- Python for Beginners – [Simplilearn](#)
- ReactJS for beginners – [Simpleilearn](#)
- Programming with JavaScript – [coursera/meta](#)
- Deliver with DevOps – [Microsoft](#)
- Describe security and compliance concepts – [Microsoft](#)
- Figma Design Basics and Features – [Alison](#)

VOLUNTEERING

- Leo Club University of Kelaniya/Sustainable Avenue – Co-Chair

LANGUAGES

- English (Professional Proficiency)
- Sinhala (Native)
